Needs

- Three meals and two snacks a day (at the minimum)

Values

- His brothers
- Making gains

Criteria For Success:

Needs LOTS of nutritious food throughout the day to keep his metabolism up.

Wants

- Nutrition information about his meals so that he can keep up his macros
- Protein-packed meals
- Lots of Gatorade and energy drinks

Fears

- That he will lose muscle in quarantine
- That the amount of food supplied to him during quarantine will not be sufficient

Naomi Lee, by Siri Avula

age: 21

residence: Los Angeles, California

education: Junior Environmental Science major

occupation: Student

marital status: Single

"Our environment and animals are the two most important things to me."

A busy junior Environmental Science major, quarantined due to exposure to COVID, trying to find meals that fit with her beliefs and values.

Needs

- Vegan Diet
- Absolutely no meat
- Healthy foods

Values

- I do not like harming animals.
- The more meat we consume, the more harm it does to animals and our environment.
- I do not believe in consuming anything that comes from an animal.

Criteria For Success:

I would like healthy foods that fit with my vegan diet. I am strongly against consuming foods that include meat or any fat from animals. I am an athlete as well and would prefer healthy foods that would keep me healthy while working out and training.

Wants

- Prefer salads, beans, tofu, rice, bread
- Almond milk, soy milk, oat milk (instead of dairy)
- Cooked meals (nothing raw please)
- Minimum of three bottles of water per day

Fears

- Will not have healthy or heavy meals throughout the day
- Will eat meat and feel sick all night

Julia Carter (by Catherine Barry)

age: 19

residence: Irmo, SC

education: Sophomore English major

occupation: Student

marital status: Single

I can't eat anything they've given me!

Sophomore English major who is quarantined alone, busy trying to keep up with school.

Needs

- Gluten free food options in order to meet dietary needs.

Values

- Healthy meals with a variety of protein, fruit/vegetables, and carbohydrates.

Criteria For Success:

Meals that allow her to have a diet that will help her recover and feel good in quarantine.

Wants

- A variety of healthy options.
- Fresh cooked food and warm meals.
- Allergy information with meals, as it can be hard to know what is or is not gluten free.

Fears

- Will not be able to eat meals due to allergies.
- Will have to guess or possibly eat something with gluten due to lack of alternative options or unknown ingredients.
